

OES Multimedia Content Development

Project Title	OES Multimedia Content Development
Project Summary	Support OES/PPO public diplomacy with multimedia content development. This may include design of graphics, photos, or video for social media, and writing of content for social or other media outlets.
Country	United States

Project Description

The incumbent will assist OES/PPO with development of content in multiple formats for use in public diplomacy efforts. Graphic design, writing, and research of specialized subject matter will be a key part of the project. OES/PPO supports the entire OES bureau for engagements with international organizations, conferences, and meetings. This VSFS intern will play an important role in creating quality media content that supports and amplifies OES public messaging.
